

Mobile Threat Defence for MMSPs

THE VALUE TO YOUR CUSTOMER

Trustd is an MTD from Traced that provides intelligent solutions to secure phones and tablets from a range of mobile-borne threats. Traced enables a secure COPE/COBO environment for Android or iOS devices, Zero Trust access to Microsoft Cloud apps, compliance with regulations around data security, and visibility of mobile-borne threats to the business without impinging on employee privacy.

TRACED IS 100% CHANNEL, WITH PROTECTED MARGINS AND 1:1 SUPPORT

- **Add value** to existing offerings.
- **Protect the hardware** you provide to clients.
- **Gain a competitive advantage** by including MTD in mobile bundles.
- **Add additional revenue streams** from managed or unmanaged licences.
- **Protect your reputation** by reducing the risk of a client data breach or cyberattack.

BENEFIT FROM TRACED'S AI-POWERED MOBILE PROTECTION

By pre-installing the Trustd mobile security app on customer iOS and Android devices you're adding protection against mobile threats including mobile phishing, compromised WiFi, and malicious apps and websites.

With Trustd you're providing Mobile Threat Defence (MTD) instead of or on top of Mobile Device Management (MDM) to achieve

compliance, prevent data breaches, and support a Zero-Trust strategy, earning you a healthy margin from wraparound managed services.

Protection is low-cost but extremely effective, guarding your client from a wide range of mobile-borne threats, reducing their cyberthreat surface and mitigating the risk of a costly data breach.

WHAT THREATS DOES TRUSTD STOP?

Network threats (Android & iOS)

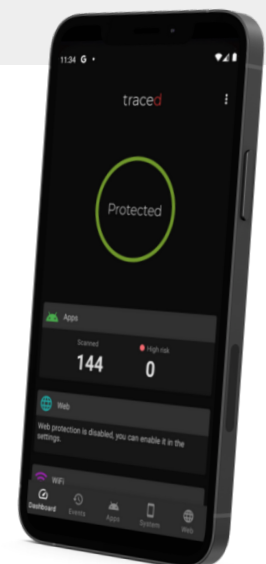

- Man-in-the-Middle attacks
- Phishing
- Malicious proxies
- Malicious web scripts
- Unsecured WiFi
- Weak WiFi security

Device threats (Android & iOS)

- OS exploits
- Vulnerable configuration

App threats (Android)

- Malware apps
- Known and unknown threats
- Screen recording
- Leaky apps
- Camera/Microphone access
- App permission abuse
